TACTILE TOGETHER

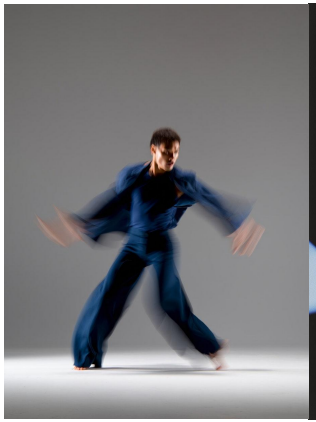

Primary Clients
We collaborate with mission-aligned organizations across tech, education, healthcare, social impact, hospitality, and the creative industries. Our clients include early-stage startups, global design teams, NGOs, and product groups with a strong commitment to accessibility, inclusion, and human-centered innovation.

Geographic Focus
Rooted in India, resonant worldwide. We work with clients who are locally grounded yet globally aware—those who prioritize ethical integrity, emotional intelligence, and thoughtful design as much as outcomes.

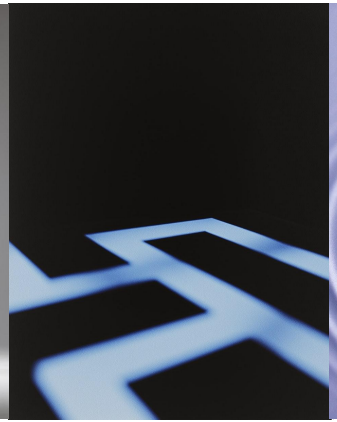

Design Maturity
Our partners typically operate at a mid-to-high level of design maturity: they're aware of UX, accessibility, and service design, but may be early in applying them systemically. We don't just design services—we help cultivate design fluency and foster long-term transformation in organizations ready to evolve.

Tactile = the emotional texture of a well-crafted experience, not just physical touch.
Together = inclusion, co-creation, and collective empathy.
